

ASCENT MACHINERIES & ENGINEERING SERVICES

Established in the year 1996,
we, "Ascent Machineries & Engg. Services",
are acknowledged for manufacturing, exporting, supplying
and service a significant range of Industrial Towers, Boilers,
Vessels And Storage Tanks.

Industrial Steam Boiler and Heating Systems

Fully Automatic

IBR & NON-IBR options

Touch screen operations with all interlocks.

Air Cooled Pumps

PLC/SCADA operation to main panel board option

Liner Control with PID temp. controllers

Steam pressure Transmitter/sensors for digital value & operations

KWH meter for instant power consumption value.

All Data recording options available on Pen Drive or PC

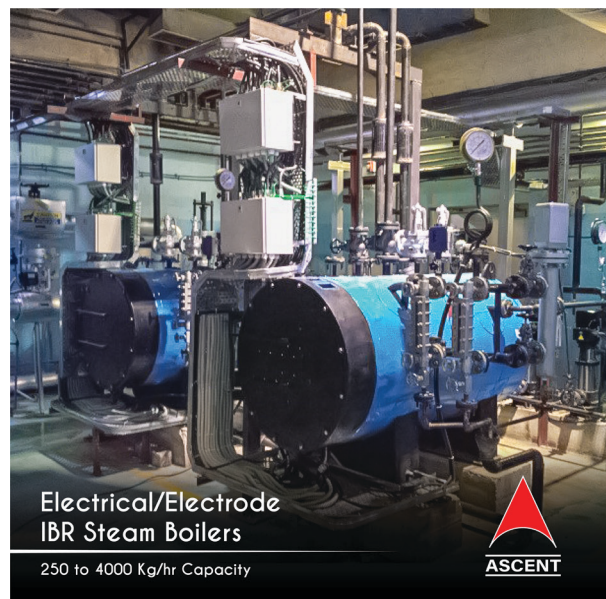

Steam Boilers

A steam boiler is a steam generating heating system. This system creates energy by heating water to get steam. Industrial steam boilers are a heat exchanger that makes steam for external usage and has a combustion chamber and water vessel. The several varieties such as steam boiler industrial, electric steam boiler etc., contain those that are very trivial and those that are huge for more challenging jobs.

Steam boiler burns fuel to heat water. The arrangement of heat and water generates steam. There are three forms of heat used to produce steam: radiation, convection, and conduction.

IBR Steam Boilers

Non IBR Steam Boilers

Hot Water Boiler/Hot Water generator

Oil Fired Hot Water Boiler/
Hot Water Generator

50000 to 4000000 Kcal/hr Capacity

Gas Fired Hot Water Boiler/
Hot Water Generator

50000 to 4000000 Kcal/hr Capacity

Electrical Hot Water Boiler/
Hot Water Generator

36000 to 1000000 Kcal/hr Capacity

Thermic Fluid Heater/ Hot Oil Systems

**Electrical
Thermic Fluid Heater**

36000 to 1000000 Kcal/hr Capacity

**Gas Fired
Thermic Fluid Heater**

50000 to 4000000 Kcal/hr Capacity

**Thermic Fluid Heater
Dual Fuel Oil/Gas**

**Thermic Fluid Heater
Dual Fuel Oil/Gas**
